With high-performance Multi-Touch and
HD Display, the HTC 8X is an ideal
smartphone for enjoying multimedia and
gaming. Enhance the HTC 8X experience
with the latest Android OS (v4.1). Like all
HTC Android smartphones, the HTC 8X
runs on Google's Android software
platform. It features a 5-inch (12.2cm)
Multi-Touch screen, along with 16GB of
internal memory and a microSD slot for
additional memory expansion. It comes
preloaded with the latest Android OS (v4.1)

with the HTC Sense interface. It also has the latest Qualcomm 1GHz Snapdragon S4 MSM8260 Dual Core processor. Improve your multimedia experience with the 8X's front-facing stereo speakers. Do more with Android. Optimized for Android smartphones, the new HTC Gallery app and HTC Video studio app now allow you to browse your photos and videos on-the-go, edit your images and videos with tools like Photo Editor, Slideshow Maker, and Video Editor, and even take snapshots and create videos with the flick of a finger. With HTC Sense you're always up-to-date on the go. Pocket now has the music streaming service Spotify, making it the most popular streaming music app for Windows Phone devices. Spotify has tens of millions of users worldwide with more than 15 million in the

US alone. Spotify offers both desktop and mobile versions of its service, but today we're going to be focused on Windows Phone. The mobile experience is pretty great and makes for a good alternative to iTunes. Playlist Management Spotify has a very robust playlist management system. Whether you're at your computer, or on your phone, you're able to create, edit, delete, and share your playlists, sort by most listened to, and view which playlists are trending in the spotify community. Spotify does offer an iOS and Android app, but not for Windows Phone, and although a desktop version of the service is available for Windows, it requires Silverlight to work. With Windows Phone, you can play your own music, play music from your OneDrive and Spotify accounts, find songs and albums

you like, get personalized recommendations, and even listen to thousands of millions of songs. Audio Equalizer The service provides a number of audio presets
