I am trying to prove $x! > \sqrt{x}!$. I know that we have $\sqrt{x} = x^{\frac{1}{2}}$. So I want to prove that $x^{\frac{1}{2}} > x$. By Archimedes' Lemma, $x^{\frac{1}{2}} \geq x$ So we want to show $x^{\frac{1}{2}} > x$ is false. But I am stuck here. How do I do it? A: Hint: $x! > \sqrt{x}!$ is equivalent to $\frac{x!}{\sqrt{x}!} > 1$ How many are the positive integer solutions of the equation $\frac{x!}{\sqrt{x}!} = 1$ How many are the positive integer solutions of $x^2 = x$ You may find yourself repeatedly using the same file or project in many places of your code. To simplify code navigation, you may want to create a single project file for a given project. Use Project | Create File... to create new file or project, with its matching name. If the newly created file is the same as the current file, the Create File command will look for the file in the current location.
